

# FORM CR CFU SUBTEST: UPDATED NORMING

We have updated the graphics for the CFU because many of the old graphics had become obsolete, making the subtest unfair to anyone who took it.

Due to these changes, we updated the norming for this subtest, which you will find below. While very similar to the old norms, there are some slight differences.

Some of the answer equivalents have been updated to reflect the changes to the graphics. You can download a list of these new equivalents on our website under Products > Resources.
